

# Commercial Service

## NEW SERVICE CONNECTIONS

If you need new power services or to change and upgrade the existing ones, we'll make sure it's ready when you need it.

Apply for new power services or make changes to existing service online or by phone. It's quick and easy!

Here are the steps to get commercial service:

### 1. Apply

When you apply - we'll need an electronic site plan with your request. Drawing your site plan to scale will help us figure out the quote and design. Show any entrances and traffic lanes as this could impact where we place the services.

If you can, please use AutoCAD Version 2000 or newer software for the site plans.

### 2. Verbal Quote (1-7 days)

After giving you a verbal quote, if you decide to proceed we'll complete a site check. This will be followed with a formal quote.

### 3. Field Check (1-7 days)

We'll come check the site and discuss the details of your request. We'll cover:

- routing
- transformer location
- work to do
- other concerns you have

### 4. Design (7-14 days)

We may ask you for a site visit to further understand your request and confirm construction details. Once we're done with the design, we'll have you review it before we order materials.

After you've approved it, changes made to the design may result in extra charges. It'll also change the construction schedule.

### 5. Written Quote (2 days)

You'll get a written quote along with all the paper work you'll need to sign. To stay on schedule, please sign and get them back as soon as you can.

### 6. Confirmation

You have 60 days to confirm the quotes.

We need confirmation in writing as well as any down payment that's stated. We'll also need you to confirm the timeline and the date your site will be ready for construction.

### 7. Land Approvals (10-30+ days)

Before we start, we need to secure land approvals. We'll work with municipalities, third parties and other utilities services. We do everything we can to secure land approvals, but we cannot guarantee anything. All approvals must be in place before construction. All timelines for approvals vary.

These are the land approvals we may need before beginning work:

- phone or cable lines: 1-2 weeks
- removal of trees or bushes: 2-3 weeks
- easement approvals: 2-3 weeks
- environmental considerations: 4-6 weeks
- pipeline approvals: 5-6 weeks
- railway crossings: 6-8 weeks
- municipality input: up to 1 month

## 8. Construction (10-30+ days)

We're ready to get to work!

We've called Sask 1st Call, received material and scheduled the crew. When we're done, you'll get an invoice for the construction chargers.

## 9. Connection (2 days)

You'll need to contact an electrician. They'll do an inspection and place the energization sticker where necessary. Once you're done this, contact us and we'll come install a power meter.

\*These timelines are approximate, and based on the unique specification of each application.
