

# Farm/Rural/Resort Service

## SERVICE REQUEST

Apply for new power services or make changes to existing service online or by phone. It's quick and easy!

Here are the steps to set up permanent or temporary power.

### 1. Apply

Apply for new power services or make changes to existing service online or by phone. It's quick and easy!

We'll need a site plan with your application. This helps us figure out the quote and design. With farm and rural sites, you don't have to draw them to scale but please include:

- the location of the point of service with measurements from property lines
- section lines or road allowances
- buildings
- driveways
- bins
- trees
- fences
- bodies of water
- other obstacles

Safety is our top priority. Please let us know if there are any potential hazards like:

- fuel tanks
- in-ground wells
- sewer lines
- water lines
- gas lines

### 2. Verbal Quote (1-7 days)

After giving you a verbal quote, if you decide to proceed we'll complete a site check. This will be followed with a formal quote.

### 3. Field Check (1-7 days)

We'll come check the site and discuss the details of your request. We'll cover:

- routing
- transformer location
- work to do
- other concerns you have

### 4. Design (7-14 days)

We may ask you for more details to better understand your request. Once we're done with the design, we'll have you review it as part of the written quote.

After you've approved it, changes made to the design may result in extra charges. It'll also change the construction schedule.

### 5. Written Quote (2 days)

You'll get a written quote along with all the paper work you'll need to sign. To stay on schedule, please sign them and get them back as soon as you can.

### 6. Confirmation

You have 60 days to confirm the quotes.

We need confirmation in writing as well as any down payment that's stated. We'll also need you to confirm the timeline and the date your site will be ready for construction. To stay on schedule, please contact your electrician for the electrical permit early in this process.

### 7. Land Approvals (10-30+ days)

Before we start, we need to secure land approvals. We'll work with municipalities, third parties and other utilities services. We do everything we can to secure land approvals, but we cannot guarantee anything. All approvals

# Farm/Rural/Resort Service

## SERVICE REQUEST

must be in place before construction. All timelines for approvals vary.

These are the land approvals we may need before beginning work:

- phone or cable lines: 1-2 weeks
- removal of trees or bushes: 2-3 weeks
- easement approvals: 2-3 weeks
- environmental considerations: 4-6 weeks
- pipeline approvals: 5-6 weeks
- railway crossings: 6-8 weeks
- municipality input: up to 1 month

### 8. Construction (10-30+ days)

We're ready to get to work! We've called Sask 1st Call, received the materials and scheduled

the crew. When we're done, you'll get an invoice for the construction chargers.

### 9. Connection (2 days)

You'll need to contact an electrician. They'll do an inspection and place the energization sticker where necessary. Once you're done this, contact us and we'll come install a power meter.

\*These timelines are approximate, and based on the unique specification of each application.
