

Pre-Serviced Lots for Private Owners

NEW SERVICE CONNECTIONS

We know you're eager to turn the power on! Apply for new power services or make changes to existing service online or by phone. It's quick and easy!

1. Apply

Once we get your request, you'll get a notification number. Be sure to keep it handy for a reference.

New joint service connections are available for residential lots in these communities:

- Saskatoon
- Regina
- Warman
- Martensville
- Dalmeny

Are you outside of these communities? We install SaskPower and SaskEnergy services in separate trenches.

Requesting for a single family dwelling or semi-detached home in a city/town/village? We'll share your information with SaskEnergy*. You'll get a tracking number from them within a few days.

**If you're in a rural municipality or resort community, we can't share your information with SaskEnergy. You can apply at www.saskenergy.com.*

Installation of your chosen communication (SaskTel, Shaw or Access) provider's line in the joint trench is possible. Please contact a provider and apply for communication service.

2. Confirming Site Readiness

Our field expeditor will visit your site prioritized by the date in your application. The expeditor will determine if the site is ready for both SaskPower and SaskEnergy*.

If the site's ready: We'll place it on a trenching list to install all utilities. We aim for a 10-day turnaround.

If the site's not ready: The expeditor will contact you. They'll confirm with you what's needed to be site ready and confirm a new site visit. You must fix all issues before the expeditor will check the site again. If approved, we'll place the site on the trench list to install all utilities. We aim for a 10- day turnaround.

3. After Installation

You'll need to contact an electrician. They'll do an inspection and place the energization sticker where necessary. Once you're done this, contact us and we'll come install a power meter.

After the electrician's placed the energization sticker, contact us. This will help speed up service.
