

HOME ONLINE ENERGY ASSESSMENT

YOU'VE GOT THE POWER TO SAVE

Get the full picture when it comes to your power and natural gas usage. Our Home Online Energy Assessment looks at lighting, heating, insulation, appliances, whether you have a hot tub or pool and even the weather in your area to estimate the power and natural gas you're using. It helps you understand where your money is going and then shows you how you can save.

Eligibility

- Saskatchewan homeowners

What You Will Receive

- An estimated breakdown of your power and natural gas usage. Find out where your money is going.
- Learn about where your money is going when it comes to your power and natural gas consumption
- The estimated consumption calculations do not include taxes or surcharges.

How To Take Part

1. Visit saskpower.com/homeaudit
2. Provide basic information about your home and the tool will instantly calculate your basic consumption and make energy and power-saving recommendations.

Benefits

- You could save money on your power bills annually
- Learn about where your money is going when it comes to your power and natural gas consumption

This assessment provides information and recommendations on both electricity and natural gas usage in order to give you the full picture when it comes to energy efficiency. It provides general consumption information and ways to save on your utility bills. This is not a representation of exact savings you could see on your utility bills. The estimated consumption calculations do not include taxes or surcharges.
